

## Morgan Hill-Student Records Disclosure

### Description

Recently, there has been a lot of information being disseminated about the disclosure of student records through the Morgan Hill Concerned Parents Association v. California Department of Education, Case No. 11-3471. To provide some clarity, the co-chairs of the California Association Parent Child Advocacy (“CAPCA”) have released a [memorandum](#) to assist informing parents about this lawsuit and the information being requested. While we do not believe that there is a privacy concern with allowing this data to be released, we believe that families should have accurate information about this when making their decision on this matter.
